### PROFILE

I am a passionate software engineering fresher eager to grow in the DevOps domain. I thrive in collaborative environments, enjoy solving real-world challenges, and am committed to becoming a proficient DevOps engineer by continuously learning and contributing to impactful projects.

### WORK EXPERIENCE

#### ● SrashtaSoft Company - Ahmedabad, India (Dec 2024 - Present)

- Set up CI/CD pipelines using Jenkins
- Automated deployments with Docker and Docker Compose
- Integrated SonarQube for code quality checks
- Hands-on experience with website hosting on WebHost, DNS management, and WordPress website migration
- Contributed to live projects by managing deployments, domain setups, and SSL configurations
- Integration for production websites
- Worked on AWS EC2 for cloud deployments

### PROJECTS

#### ● Skill Spring Freelance Network

Using Django Rest\_Framework and React JS

- Developed a full-stack freelancing platform using React for the front-end and Django for the back-end. Implemented features like talent search, project proposals, and JWT-based authentication for secure user access.

#### ● Ace Bank

Using Django Rest\_Framework and React JS

- Designed and developed a secure banking system using React and Django, featuring user account management, fixed deposit handling, and real-time balance updates. Integrated Django REST framework for seamless API interactions.

#### ● Music Player System

Using Java and Python (Individually)

#### ● ATM Management System

Using Java and Python (Individually)

### CERTIFICATION

#### Google Coursera Certification

- Exploratory Data Analysis for Machine Learning
- Inheritance and Data Structures in Java
- Introduction to Java
- HTML, CSS, and Javascript for Web Developers
